Jan 2012 to Dec 2015

High School / E.E.B João Widemann - Blumenau - SC - Brazil

About

I started working at 14 years old. Despite not being able to work with technology at that time, due to lack of opportunities, my main goal was always to work with computers. At 16 I found a job as Technical Support and moved forward with web development (PHP + HTML + CSS + VanillaJS).

I Have some completed courses associated with frontend at Caelumn and actually I'm looking for more knowledge about functional backend and frontend like RxJS, Elixir, Erlang, Clojurescript.
